

Monday's Home Learning suggestions

9.00am Register

Good morning! Please **reply** to the text register to update the teams on your learning status for the day. Please leave a **comment** on the text register if you would like any support and for a member of staff to give you a phone call. We are here to help you. We hope you have a great day. Here are today's activities. Feel free to organise the activities however works for you. Have fun!

PHYSICAL ACTIVITY

- Cosmic Kids yoga for little ones - enjoy a pirate adventure!
<https://www.youtube.com/watch?v=GDwyVonx35Q&t=97s>

STORY : Today we are going to listen to the story of Titch

https://www.youtube.com/watch?v=X_BNxLeKI20

MATHS/ Creative activity

Today we are going to create a **height chart** for everybody at home. Have a look at the photo to help you. Lie down and measure yourself, put the string next to you to see how tall you are. You can use ribbon, wool or string. Put the string on the wall. Who is the **tallest** ? **Shorest** ? Put them in order from **biggest** to **smallest**.

LUNCH – Let your child set the table, pour the water, or cook the food with you. They can count out or measure portions, learn new vocabulary, and expand their food tastes!

SINGING today by Kymberly Stewart **I am a Robot.**

<https://www.youtube.com/watch?v=qblL61Ex3avM>

See if you can dance like a robot too.

Weekly Science Activity (this stays the same for the rest of the week)

Oil, Water & Cotton Science Experiments

1. Mix milk and water
2. Mix oil and water
3. Drop cotton balls in water

- What will happen when you mix oil and water. Is it the same if you mix milk with water? Why not?
- Try to predict – will the oil and water mix? Will the cotton ball float or sink in water?
- Cotton balls are interesting to **observe** because they initially **float**. When they become **saturated** with water, they sink to the bottom.
- Oil does not mix with water – they stay separate, whereas the milk and water mix. Water is more dense than oil so it sits at the bottom.
- Use the sense of touch, sight, and smell observe what happens.
- Dip the cotton balls into the oil and make predictions about what would happen when they were placed in the water.
- TIP: to encourage good hand control and dexterity, use tweezers to pick up the cotton.

End of the Day Please **upload pictures and examples of your home learning directly onto the Evidence Me app or web suite** for the teachers to review and celebrate. If you have any technical difficulties or need help installing and using the app, please comment on the morning register and we will get back to you with support.
