

Dear KS1 Parents and Carers,

Your child has access to Mathseeds, the sister site to Reading Eggs.

Mathseeds is an interactive app that is aimed at helping children build their mathematical skills at their own pace.

While Reading Eggs is a whole school subscription, Mathseeds is a subscription for Reception and KS1 children.

Your child's account will automatically be linked for both programmes. All you need to do is access the main page via Reading Eggs and select the Mathseeds icon.

This will bring you to the main page of **Mathseeds**

The first time that your child uses the programme they will have to complete a placement test so that they start on the correct level for them. **Just click on the acorn character, Buddy, to start the placement.**

Kind Regards,

Marina Castelo Branco
Maths Curriculum Leader

and

Sophie Tait
KS1 Phase Leader
